

CREATING A SERVICE INSTANCE

- First, Register and Login in your IBM cloud Account.
- Click on Catalog.

- Type Cloudant in the Search bar and Click on Open it.
- Select an Offering and an environment.
- Select region as Dallas and Type an instance name then click on create service.

- After you click create the system displays a message to say that the instance is being provisioned, which returns you to the Resource list.

From the Resource list, you see that the status for your instance is, Provision in Progress.

→ When the status changes to active, click the instance.

The screenshot shows the IBM Cloud 'Resource list' page. The page has a dark theme and a sidebar on the left with navigation icons. The main content area displays a table of resources. The table has the following columns: Name, Group, Location, Product, Status, and Tags. The 'Status' column for the 'Cloudant-vv' instance shows a green dot and the word 'Active'. The 'Tags' column for this instance shows a minus sign. The table is filtered by 'Name' and 'Group'. The 'Cloudant-vv' instance is the only one listed with a status of 'Active'.

Name	Group	Location	Product	Status	Tags
Cloudant-vv	Default	Dallas	Cloudant	Active	-
